## INDEPENDENT AUDITOR'S REPORT

To the Honorable Mayor and Board of Trustees Town of Lochbuie, Colorado

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the Town of Lochbuie, Colorado (the Town) as of and for the year ended December 31, 2018, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the Town of Lochbuie, Colorado, as of December 31, 2018, and the respective changes in financial position and, where applicable, cash flows thereof and the budgetary comparison for the general fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

## **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis on pages III through XI and budgetary comparison information and pension-related schedules on pages 42 through 45 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information on pages III through XI and pages 42 through 45, in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town's basic financial statements. The supplementary information and the local highway finance report (together, the information) as listed in the table of contents are presented for purposes of legal compliance and additional analysis and are not a required part of the basic financial statements. The information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling the information directly to the underlying accounting and other records used to prepare the basic financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements as a whole.

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

#### December 31, 2018

This discussion and analysis of Lochbuie's financial statements for the year ended December 31, 2018 provides a narrative overview of the Town's financial activities. Please consider the information here in conjunction with the accompanying financial statements and notes to the financial statements.

#### <u>The Town</u>

The Town of Lochbuie is what is known as a Mayor-Board style statutory Town. This classification, in contrast to a home-rule town, limits the authority the Town exercises, primarily in the area of taxes and tax collection. The Town consists of an elected Mayor and six Town Board trustees. The Town also appoints a Town Treasurer and Town Clerk. The top three candidates for Board seats receive staggered 4 year terms, with the remaining 3 seats and the Mayor receiving a 2 year term. The Town Treasurer and Town Clerk are appointed to 2 year terms. The Town Board employs a Town Administrator to direct the daily activities and functions of the Town.

The Town is located in the northeast Denver metropolitan area and is located within Weld and Adams Counties. The Town is adjacent to the Cities and Towns of Brighton, Hudson and Fort Lupton. The Town encompasses 5 square miles, or 16,000 acres, with approximately 6,000 residents and 1,800 households. The Town provides the majority of its core services by its own means through a Town controlled Waste Water Treatment Plant, Reverse Osmosis Plant and employs its own Police Department.

The primary sources of revenue for Towns in Colorado are sales and use taxes, as is true for Lochbuie. Property taxes are the next largest source of governmental revenues. Other sources of governmental revenue include miscellaneous fees generated through the Town's gas, electric and cable providers and other taxes and fees. The Town also records program-type revenues from court fines and fees, land use and permitting fees, and capital grants and contributions.

#### Financial Highlights

- Assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$37,999,717 at December 31, 2018.
- Net position of governmental activities increased by \$300,329, and net position of business-type activities increased by \$3,312,533.
- Fund balance of the general fund increased by \$3,835,018. This increase was primarily a result of bond proceeds received that are restricted for use to fund capital improvement projects.

Other Highlights:

- Building continued in 2 subdivisions within Town limits.
- The Town issued \$4,500,000 in Series 2018 Limited Tax Obligation Bonds for the purpose of funding the costs of capital improvements for the Town.

The Town provides its employees with pension and other postemployment benefits (OPEB) through two multiple employer cost-sharing defined benefit pension plans administered by the Colorado Fire and Police Pension Association (FPPA) and Colorado Public Employees' Retirement Association (PERA). It is important to note that the Town does not currently have to pay the amount shown as the Town's net pension and OPEB liabilities nor will the Town receive any benefit from the net pension asset. The Town's direct

liability is limited to the annually required contributions established by the State Legislature. In addition, the Town does not have any control over the investment policies associated with PERA and FPPA investments. These responsibilities lie solely with the PERA and FPPA board and administration. Decisions regarding the plan benefit design and the funding policies lie solely with the State Legislature. Please refer to Notes 7, 8 and 9 within the Notes to Financial Statements section of this report.

#### **Overview of the Financial Statements**

This discussion and analysis is intended to serve as an introduction to the Town's basic financial statements. The Town's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to financial statements. This report also contains other required supplementary information and supplementary information in addition to the basic financial statements themselves.

#### **Government-wide Financial Statements**

The Government-wide Financial Statements are designed to provide readers with a broad overview of the Town's finances, in a manner similar to a private-sector business.

The Statement of Net Position presents information on all of the Town's assets and liabilities and deferred inflows of resources, with the difference between the two reported as Net Position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating. The reader of the financial statements should also consider other non-financial factors, such as changes in the composition or quality of the Town's sales tax base and perhaps the condition of the Town's infrastructure, to assess the overall health of the Town.

The Statement of Activities presents information showing how the government's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash flows*. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

In the Statement of Net Position and Statement of Activities, the Town is divided into two kinds of activities:

- Governmental activities most of the Town's basic services are reported here including public safety, public works, municipal court and general administration. Sales and use taxes, property taxes, fees and charges from the court and franchise fees finance most of these activities. Governmental activities of the Town also include the financing, construction of, and maintenance of governmental infrastructure constructed or acquired by the Town during the current year.
- Business-type activities the Town charges a fee to customers to cover all or most of the cost of certain services it provides.

#### Fund Financial Statements

A *fund* is a grouping of related accounts used to maintain control over resources that have been segregated for specific activities or objectives. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town are governmental or proprietary funds.

#### Governmental Funds

Governmental funds are used to account for essentially the same functions reported as *governmental* activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable* resources, as well as on *balances of spendable resources* available at the end of the fiscal year. Such

information may be useful in evaluating a government's near-term financing requirements. In particular, *fund balance, whether assigned, committed or unassigned,* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The Town maintains two individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for each of the Town's major governmental funds, the General Fund and the Conservation Trust Fund.

The Town adopts an annual appropriated budget for its General Fund. A budgetary comparison statement has been provided for this fund in the *basic financial statements* to demonstrate compliance with this budget.

#### Proprietary Funds

Enterprise funds are used to report any activity for which a fee is charged to external users for goods and services. The Town utilizes two enterprise funds to account for water and sewer. The proprietary fund financial statements provide the same type of information as shown in the government-wide financial statements, only these statements provide a more detailed level of information.

#### Notes to Financial Statements

The notes to the financial statements provide additional information essential to a full understanding of the data provided in the government-wide and fund financial statements.

#### **Required Supplementary and Other Information**

In addition to the basic financial statements and accompanying notes, the report also presents certain supplementary information which is required to be disclosed by the *Governmental Accounting Standards Board* and other supplemental information presented for legal compliance and additional analysis.

#### Government-wide Financial Analysis

At the close of 2018, total net position was \$37,999,717. The largest portion of net position is the investment in capital assets (net of related debt) of \$24,859,410 (65% of net position). The amount reflects the investment of all capital assets (e.g. infrastructure, land, buildings and equipment), net of accumulated depreciation, less any debt used to acquire those assets that are still outstanding. The capital assets are used to provide services to citizens; consequently, these assets are not available for future spending. Although the investment in capital assets is reported net of debt, the resources needed to repay this debt must be provided from other sources since capital assets themselves cannot be used to liquidate those liabilities. The following table summarizes the Town's governmental and business-type net position as of December 31, 2018.

	Governmental Activities	Business-type Activities	Total Primary Government			
Current and other assets	\$ 7,708,833	\$ 12,447,610	\$ 20,156,443			
Capital assets	5,005,029	22,884,545	27,889,574			
Total assets	12,713,862	35,332,155	48,046,017

Ending net position	\$ 5,860,218	\$ 28,526,636	\$ 34,386,854			

#### **Governmental Activities**

Governmental activities increased Lochbuie's net position by \$300,329. The increase in revenue from 2017 to 2018 of \$1,001,003 (26%) was a result of increases in permit fee income and property and sales and use tax revenue. Expenses (government-wide) increased by \$529,253, or 13%, from 2017 to 2018, primarily due to a payment to a District for previously collected fees related to Lake Henry Reservoir (see Note 11).

#### **Business-type Activities**

Business-type activities for the year resulted in an increase of net position by 3,312,533. Charges for services and other operating-related revenue decreased from 2017 to 2018 by approximately 275,425, or 4%.

#### **Governmental Funds**

As of the end of 2018, the Town's governmental funds reported a combined ending fund balance of \$6,766,181.

The Town has two major governmental funds. They are the General and Conservation Trust Funds.

The General Fund is the primary operating fund for the Town of Lochbuie and reports a fund balance of \$6,655,859 as of December 31, 2018. General Fund departments consist of Legislative, Administration, Police, Judicial and Public Works. Approximately 59% of the balance is the result of remaining unspent bond proceeds. Remaining proceeds will be utilized for capital improvements.

The Conservation Trust Fund had a total fund balance at the end of 2018 of \$110,322. This fund accounts for State of Colorado lottery funds and is to be used for parks and recreation services and capital investment.

#### **Proprietary Fund**

The Town's proprietary fund statements provide the same type of information found in the governmentwide financial statements in more detail.

#### Capital Asset and Debt Administration

#### **Capital Assets**

The Town of Lochbuie's investment in capital assets for its governmental and business-type activities as of December 31, 2018 amounted to \$24,859,410. The investment in capital assets includes land, buildings, building improvements, and equipment and infrastructure, net of accumulated depreciation.

#### Long Term Debt

At the end of 2018, total bonded debt outstanding was \$6,755,000. This debt represents \$5,245,000 related to general governmental obligation bonds and \$1,510,000 related to bonds secured solely by specific revenue sources (i.e., revenue bonds). In 2018, the Town issued its Series 2018 bonds in the amount of \$4,500,000.

#### Economic Factors and Next Year's Budget and Rates

Beginning in 2001, the voters of Lochbuie endorsed an aggressive growth policy by approving General Fund debt for certain capital improvements. The debt was to be repaid through *ad valorum* taxes on an increasing number of residences.

The Budget for 2018 included these important features:

Continuation of Water and Waste Water maintenance and improvement projects

Continuation of expanded street improvement program

Public park improvements.

#### Administrative Services

<u>Town Administrator</u> – The Town Administrator serves at the pleasure of the Board of Trustees. The Administrator is charged with ensuring that policies of the Board of Trustees are implemented and functions as the Chief of Staff for the Town Departments as well as serving as the Director of Public Safety, Building Official and Town Attorney liaison.

<u>Town Clerk</u> – The Town Clerk is the custodian of all the Town records, makes a record of Town Board meetings, and fulfills all the statutory duties of a Town Clerk and works as the Office Manager. They serve as an advisor to the Town Administrator and to the Board of Trustees. The Clerk oversees the Human Resources Department. This department maintains personnel records. The Clerk supervises the Court System and the Utility Billing System.

<u>Town Treasurer</u> - The Town Treasurer is responsible for maintaining the financial records of the Town, prepares or causes to be prepared the financial statements of the Town, maintains Town bank accounts and investment accounts, ensures that receivables and payables are transacted properly and advises the Town Administrator and the Board of Trustees as to the financial condition of the Town. The Treasurer oversees the work of the Accounts Payable, Purchasing and Payroll Departments and assists with the annual audit. Currently, the Treasurer is a certified public accountant contracting services to the Town.

<u>Municipal Court</u> – Lochbuie Municipal Court is a court of record. Court is conducted on the 2<sup>nd</sup> Friday of each month beginning at 8:30 am. Additional sessions of court are conducted as necessary based on case load or extraordinary circumstances. The court is presided over by a judge appointed to a two-year term as a part-time judge. The judge is relieved by an alternate judge in his absence. The judge is assisted by a Court Clerk, whose job is part-time. The person who serves as the Court Clerk also serves as Police Clerk and Assistant Town Clerk. When Court is in session a bailiff is provided by the police department. One or more of the Administrative staff members assist in court sessions in various duties to assist the Clerk, the prosecutor and the judge. The Town employs a law firm to serve as prosecutors. Translation services are routinely provided by a part-time translator and by bi-lingual, Spanish-speaking staff members.

<u>Building Department</u> – The Building Department manages the construction activities in the Town including infrastructure inspections, building permits, building inspections and utility installation. The department also includes the planning commission whose activities include review of all proposed development, proposed zoning changes, master plan development and review, parks and recreation planning, traffic planning and general municipal engineering matters. The majority of the Department's functions are contracted out to qualified contractors. The Planning Commission meets as required and the staff and contractors supports the commission activities.

<u>Public Works</u> – The Director of Public Works supervises the Public Works Department. The department manages all water, waste water, storm water, streets and parks functions. The operation of the water and waste water facilities and all required services for the operation thereof are managed by an Operator in Responsible Charge (ORC). In 2018, a staff of 2 FTEs provides all street cleaning, plowing and minor repair services, water meter repair and maintenance, meter reading, water and sewer line repair and maintenance, parks maintenance and construction.

<u>Police</u> – The Police Department is staffed by a full-time Chief, eight patrol officers and a full-time clerk. Code enforcement functions are performed by an independent contractor.

<u>Fire Protection</u> – Fire protection is provided by the Hudson Fire Protection District in part of the Town and the Greater Brighton Fire Protection District in part. Hudson is an all-volunteer department while Brighton is a combination paid-volunteer department.

<u>Emergency Medical Services</u> – Ambulance service is provided by Platte Valley Ambulance, based at Brighton's Platte Valley Medical Center and secondary EMS transport is provided by Weld County Paramedics. The ambulance is supported by the appropriate fire department.

<u>Trash Service</u> – Solid waste management is provided by the Town through a contract trash hauling company. Fees for this service are collected with the utility bills.

#### **Request for Information**

This financial report is designed to provide a general overview of the Town of Lochbuie's finances for all those with an interest in the Town's finances. Questions concerning any of the information provided in the report or requests for additional financial information should be addressed to:

The accompanying Notes to the Financial Statements are an integral part of these statements.

#### RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES, AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES

#### For the Year Ended December 31, 2018

Net change in fund balances - total governmental funds:	\$	3,868,779
Amounts reported for Governmental Activities in the Statement of Activities are different because:		
Governmental funds report outlays for capital assets as expenditures. However in the statement of activities		
the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. Depreciation expense Capital outlay		(228,419) 899,168
The repayment of long-term debt (e.g. bonds, leases) is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net position.		420,000
Proceeds from long-term debt (e.g. bonds, leases) is a revenue source in the governmental funds,		
but the proceeds increase long-term liabilities in the statement of net position.		(4,660,556)
Some expenses reported in the statement of activities do not require the use of current financial resources and these are not reported as expenditures in governmental funds:		
Accrued interest payable - change		(12,277)
Net pension liability and related amounts - change		4,204
Net OPEB liability and related amounts - change		557
Accrued compensated absences - change		3,828
Bond premium amortization Change in net position of governmental activities	¢	5,045
	φ	300,329

The accompanying Notes to the Financial Statements are an integral part of these statements.

#### NOTES TO FINANCIAL STATEMENTS

#### December 31, 2018

#### Note 1 <u>Definition of reporting entity</u>

The Town was organized as a statutory Town in Colorado by court order in 1974. The Town provides general government, public works (roads and streets), police, water, and sewer for the geographical area organized as the Town.

The Town follows the Governmental Accounting Standards Board (GASB) accounting pronouncements which provide guidance for determining which governmental activities, organizations and functions should be included within the financial reporting entity. GASB pronouncements set forth the financial accountability of a governmental organization's elected governing body as the basic criterion for including a possible component governmental organization in a primary government's legal entity. Financial accountability includes, but is not limited to, appointment of a voting majority of the organization's governing body, ability to impose its will on the organization, a potential for the organization to provide specific financial benefits or burdens and fiscal dependency.

The Town is not financially accountable for any other organization, nor is the Town a component unit of any other primary governmental entity.

#### Note 2 <u>Summary of significant accounting policies</u>

The more significant accounting policies of the Town are described as follows:

#### Government-wide and fund financial statements

The government-wide financial statements (i.e. the statement of net position and the statement of activities) report information on all of the activities of the Town. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of net position reports all financial and capital resources of the Town. The difference between the assets and deferred outflows of resources, and liabilities and deferred inflows of resources of the Town is reported as net position.

The statement of activities demonstrates the degree to which the direct and indirect expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment, and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for governmental funds and proprietary funds. Major individual governmental and enterprise funds are reported as separate columns in the fund financial statements.

#### Measurement focus, basis of accounting and financial statement presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows.

The Town follows Governmental Accounting Standards Board pronouncements in the proprietary fund financial statements.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Town considers revenues to be available if they are collected within 60 days of the end of the current fiscal period.

Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met. Interest associated with the current fiscal period is considered to be susceptible to accrual and so has been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the Town.

Expenditures, other than interest on long-term obligations, generally are recorded when the liability is incurred or the long-term obligation is paid.

The Town reports the following major governmental funds:

<u>General Fund</u> - The General Fund is the Town's primary operating fund. It accounts for all financial resources of the general government, which include the following departments: Legislative, Judicial, Administrative, Public Safety-Police, Community Development, and Public Works.

<u>Conservation Trust Fund</u> – The Conservation Trust Fund accounts for State of Colorado lottery funds to be used for parks and recreation services and capital investment.

The Town reports the following major proprietary funds:

<u>Enterprise Funds</u> are used to account for operations that are financed and operated in a manner similar to private business enterprises - where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

The Enterprise Funds consist of the Water Utility and the Sewer Utility. The Water Utility provides both potable and non-potable (irrigation) water to the Town's citizens, while the Sewer Utility provides sanitation services.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues are charges to customers for water and sewer service. Operating expenses include the costs of the services, administrative expenses, and depreciation of capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses or capital contributions.

When both restricted and unrestricted resources are available for use, it is the Town's policy to use restricted resources first, then unrestricted resources as they are needed.

#### Cash Equivalents

For the purpose of the statement of cash flows of the enterprise funds, cash and cash equivalents include operating and restricted cash deposits and highly liquid investments with original maturities of three months or less from the date of acquisition.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

#### Accounts receivable, allowance for doubtful accounts

User fees and tap fees constitute a perpetual lien on or against property served until paid. Such liens may be foreclosed upon as provided by the State of Colorado. Therefore, no provision for uncollectible receivables has been made in the financial statements.

#### Property taxes

Property taxes are levied by the Town's Board of Trustees. The levy is based on assessed valuations determined by the County Assessor generally as of January 1 of each year. The levy is normally set by December 15 by certification to the County Commissioners to put the tax lien on the individual properties as of January 1 of the following year. The County Treasurer collects the determined taxes during the ensuing calendar year. The taxes are payable by April or if in equal installments, at the taxpayer's election, in February and June.

Delinquent taxpayers are notified in August and generally sales of the tax liens on delinquent properties are held in November or December. The County Treasurer remits the taxes collected monthly to the Town.

Property taxes, net of estimated uncollectible taxes, are recorded initially as deferred inflows of resources in the year they are levied and measurable. The deferred inflows are recorded as revenue in the year they are available or collected.

#### **Capital Assets**

Capital assets are reported in the applicable governmental or business-type activities columns in the governmentwide financial statements. Capitalized assets are defined by the Town as assets that have a useful life of one or more years and for which the initial, individual value equals or exceeds the following dollar amounts:

Asset Class	Doll	ar Value	
Land	No N	No Minimum	
Buildings	No I	Minimum	
Building and Other Improvements	\$	5,000	
Furniture and Equipment	\$	5,000	
Infrastructure	\$	5,000	

All purchased assets are valued at cost where historical records are available and at an estimated historical cost where no historical records exist. Donated assets are valued at estimated fair market value on the date received. The cost of normal maintenance and repairs that does not add to the value of an asset or materially extend asset life is not capitalized.

Depreciation on all assets is provided on the straight-line basis over the following estimated useful lives:

Asset Class	Useful Life
Buildings	40 years
Building and Other Improvements	20 years
Water and Sewer Systems	25 - 35 years
Furniture and Equipment	5 – 30 years
Infrastructure	15 – 40 years

Public domain assets consisting of roads, bridges, curbs and gutters, streets and sidewalks, drainage systems and lighting systems are examples of infrastructure assets. Infrastructure assets are distinguished from other

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

capitalized assets since their useful life often extends beyond most other capital assets and are stationary in nature. General infrastructure assets are those associated with or arising from governmental activities.

#### Pooled Cash and investments

The Town follows the practice of pooling cash and investments of all funds to maximize investment earnings. Except when required by trust or other agreements, all cash is deposited to and disbursed from a single bank account. Cash in excess of immediate operating requirements is pooled for deposit and investment flexibility. Investment earnings are allocated periodically to the participating funds based on each fund's average equity balance in total cash.

#### Compensated absences

It is the Town's policy to permit employees to accumulate earned, but unused, vacation and sick pay benefits. These benefits accrue together as Paid Time Off (PTO). PTO accrues to a maximum of 180 hours, depending on length of employment. Compensated absences are recorded as current salary cost when paid in government funds, and is accrued in the enterprise fund.

#### Contributed capital

Tap fees and plant investment fees are generally recorded as capital contributions when received.

#### Defined benefit pension plans

The Town participates in the Local Government Division Trust Fund (LGDTF), a cost-sharing multiple-employer defined benefit pension fund administered by the Public Employees' Retirement Association of Colorado ("PERA"). The net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, pension expense, information about the fiduciary net position and additions to/deductions from the fiduciary net position of the LGDTF have been determined using the economic resources measurement focus and the accrual basis of accounting. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

During the 2018 legislative session, the Colorado General Assembly passed significant pension reform through Senate Bill (SB) 18-200: Concerning Modifications to the Public Employees' Retirement Association Hybrid Defined Benefit Plan Necessary to Eliminate with a High Probability the Unfunded Liability of the Plan Within the Next Thirty Years. Governmental accounting standards require the net pension liability and related amounts of the LGDTF for financial reporting purposes be measured using the plan provisions in effect as of the LGDTF's measurement date of December 31, 2017. As such, the following disclosures do not include the changes to plan provisions required by SB 18-200 with the exception of the section titled Changes between the measurement date of the net pension liability and December 31, 2018.

#### Postemployment benefits other than pensions

The Governmental Accounting Standards Board (GASB) released Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions,* that is effective for the Town for fiscal year ending December 31, 2018. This statement details the reporting requirements for employers regarding other post-employment benefit (OPEB) plans.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

For purposes of measuring the net OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Health Care Trust Fund (HCTF) administered by the Public Employees' Retirement Association of Colorado (PERA) and additions to/deductions from the HCTF's fiduciary net position have been determined on the same basis as they are reported by the HCTF. For this purpose, the HCTF recognizes benefit payments when due and payable in accordance with benefit terms. Investments are reported at fair value.

FPPA administers the Statewide Death & Disability Plan discussed in Note 7, which qualifies as a cost sharing multiple-employer defined benefit OPEB plan under the standard. This plan covers substantially all active full-time (and some part-time) employees of fire and police departments in Colorado. As it pertains to the requirements in Statement No. 75 regarding the FPPA Statewide Death & Disability Plan and the Town, FPPA concluded that because all contributions to the plan are considered member contributions (and not employer), the employers' proportionate share of any Net OPEB liability (asset) is \$-0-.

#### **Fund Equity**

In order to more clearly define fund balance categories and to describe the nature and extent of the constraints placed on the Town's fund balances, the fund financial statements may include any or all of the following classifications to describe the relative strength of spending constraints.

Non-spendable fund balance – The portion of fund balance that cannot be spent because it is either not in spendable form (such as inventory) or is legally or contractually required to be maintained intact.

Restricted fund balance – The portion of fund balance constrained to being used for a specific purpose by external parties (such as grantors or bondholders), constitutional provisions or enabling legislation.

Committed fund balance – The portion of fund balance constrained for specific purposes according to limitations imposed by the Town's highest level of decision making authority, the Board of Trustees prior to the end of the current fiscal year. The constraint may be removed or changed only through formal action of the Town Board.

Assigned fund balance – The portion of fund balance that is constrained by the government's intent to be used for specific purposes, but is neither restricted nor committed. Intent is expressed by the Town Board to be used for a specific purpose. Constraints imposed on the use of assigned amounts are more easily removed or modified than those imposed on amounts that are classified as committed.

Unassigned fund balance – The residual portion of fund balance that does not meet any of the above criteria.

If more than one classification of fund balance is available for use when expenditure is incurred, it is the Town's policy to use the most restrictive classification first.

At December 31, 2018, the Town had \$123,000 restricted by legislation (for emergencies), \$3,918,998 restricted by bondholders and \$110,322 restricted for parks and recreation (Conservation Trust).

At December 31, 2018, the Town had \$182,323 assigned balances for a future school building and \$29,806 for the Town's insurance deductible.

The remaining fund balance is considered by the Town to be unassigned. At December 31, 2018, the Town had an unassigned fund balance in the general fund of \$2,389,350.

#### Budgets

In accordance with the State Budget Law, the Town's Board of Trustees holds public hearings in the fall each year to approve the budget and appropriate the funds for the ensuing year. The appropriation is at the total fund

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

expenditures level and lapses at year-end. The Town's Board of Trustees can modify the budget by line item within the total appropriation without notification. The total appropriation can only be modified upon completion of notification and publication requirements. The budget includes each fund on its basis of accounting unless otherwise indicated.

#### Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires that the Town's management make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

#### Note 3 Cash and Investments

Cash and investments are reflected on the December 31, 2018 Statement of Net Position as follows:

Cash and investments	\$ 14,358,100
Cash and investments-restricted	4,195,408
Total cash and investments	\$ 18,553,508

Cash and investments as of December 31, 2018 consist of the following:

Cash on hand	\$ 1,295
Deposits with financial institutions	16,970,876
Investments	 1,581,337
Total cash and investments	\$ 18,553,508

At December 31, 2018, the Town's cash deposits had bank balances of \$16,883,226 and carrying balances of \$16,970,876.

#### Deposits with financial institutions

The Colorado Public Deposit Protection Act, (PDPA) requires that all units of local government deposit cash in eligible public depositories. State regulators determine eligibility. Amounts on deposit in excess of federal insurance levels must be collateralized. As of December 31, 2018, the federal insurance limit was \$250,000. The eligible collateral is determined by the PDPA. PDPA allows the institution to create a single collateral pool for all public funds. The pool is to be maintained by another institution, or held in trust for all the uninsured public deposits as a group. The market value of the collateral must be at least equal to 102% of the aggregate uninsured deposits.

The State Commissioners for banks and financial services are required by statute to monitor the naming of eligible depositories and reporting of the uninsured deposits and assets maintained in the collateral pools.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

#### Custodial credit risk - deposits

Custodial credit risk is the risk that in the event of a bank failure, the Town's deposits may not be returned to it. The Town's cash deposit and investment policy adopts state statutes regarding custodial credit risk for deposits. As of December 31, 2018, the Town's bank balances and carrying balances were insured or collateralized as follows:

Bank balances		
Federally insured	\$	500,000
Collateralized		16,383,226
Total bank balances	\$	16,883,226
Carrying balances	\$	500,000
Federally insured Collateralized	φ	16,470,876
Total carrying balances	\$	16,970,876

#### Investments

The Town's investment policy adopts state statutes regarding investments.

The Town primarily limits its investments to local government investments pools and money market funds, which are believed to have minimal credit risk, minimal interest rate risk and no foreign currency risk. Additionally, the Town is not subject to concentration risk disclosure requirements or subject to custodial credit risk for investments that are in the possession of another party.

Colorado revised statutes limit investment maturities to five years or less unless formally approved by the Board of Directors. Such actions are generally associated with a debt service reserve or sinking fund requirements.

Colorado statutes specify investment instruments meeting defined rating and risk criteria in which local governments may invest which include:

- Obligations of the United States, certain U.S. government agency securities and securities of the World Bank
- General obligation and revenue bonds of U.S. local government entities
- Certain securities lending agreements
- Certain certificates of participation
- Bankers' acceptances of certain banks
- Commercial paper
- Written repurchase agreements and certain reverse repurchase agreements collateralized by certain authorized securities
- Certain money market funds
- Guaranteed investment contracts
- Local government investment pools

The local government investment pools, which include the Colorado Surplus Asset Fund Trust (CSAFE) and the Colorado Local Government Liquid Asset Trust (Colotrust), are both rated AAAm by Standard & Poor's.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

As of December 31, 2018, the Town had the following investments:

Investment Colorado Liquid Asset Trust (Colotrust) <u>Maturity</u> Weighted average under 60 days

\$ 1,581,337

#### COLOTRUST

The Town invested in the Colorado Local Government Liquid Asset Trust (the Trust), an investment vehicle established for local government entities in Colorado to pool surplus funds. The State Securities Commissioner administers and enforces all State statutes governing the Trust. The Trust operates similarly to a money market fund and each share is equal in value to \$1.00. The Trust offers shares in two portfolios, COLOTRUST PRIME and COLOTRUST PLUS+. Both portfolios may invest in U.S. Treasury securities and repurchase agreements collateralized by U.S. Treasury securities. COLOTRUST PLUS+ may also invest in certain obligations of U.S. government agencies, highest rated commercial paper and repurchase agreements collateralized by certain obligations of U.S. government agencies, highest rated commercial paper and any security allowed under CRS 24-75-601. A designated custodial bank serves as custodian for the Trust's portfolios pursuant to a custodian agreement. The custodian acts as safekeeping agent for the Trust's investment portfolios and provides services as the depository in connection with direct investments and withdrawals. The custodian's internal records segregate investments owned by the Trust. COLOTRUST is rated AAAm by Standard & Poor's. COLOTRUST records its investments at fair value and the Town records its investment in COLOTRUST using the net asset method. There are no unfunded commitments, the redemption frequency is daily and there is no redemption notice period.

#### **Restricted cash and investments**

As of December 31, 2018, \$164,800 was held in trust and restricted for the required reserve securing the Water Revenue Refunding and Improvement Bonds, Series 2012. \$3,918,998 was restricted for use on capital improvements as required by bond documents. \$111,610 was restricted for parks and recreation expenditures as required for conservation trust proceeds.

#### NOTES TO FINANCIAL STATEMENTS (continued)

## December 31, 2018

## Note 4 Capital Assets

Capital asset activity for the year ended December 31, 2018 was as follows:

#### **Bonds Payable**

#### General Obligation Bonds, Series 2018, dated April 18, 2018

The bonds, in the original amount of \$4,500,000, mature on December 1, 2037, and require principal payments due on each December 1 with mandatory sinking fund redemption beginning in 2031. Interest at rates ranging from 3% to 4% is payable on June 1 and December 1 each year. The bonds are subject to redemption prior to maturity, at the option of the Town, on December 1, 2026 and on any date thereafter, without redemption premium. The bonds were issued to fund general capital projects. As of December 31, 2018, restricted cash of \$3,918,998 remained from bond proceeds for the use of capital improvements.

#### General Obligation Bonds, Series 2012, dated November 20, 2012

The bonds, in the original amount of \$2,140,000, mature on December 1, 2022 with annual mandatory sinking fund principal payments due on each December 1. Interest at rates ranging from 2% to 3% is payable on June 1 and December 1 each year. The bonds are subject to redemption prior to maturity, at the option of the Town, on December 1, 2019 and on any date thereafter, without redemption premium. The bonds were issued to refund the Series 2002 G.O. Bonds.

#### Water Revenue Refunding Bonds, Series 2012, dated November 20, 2012

The bonds, in the original amount of \$2,180,000, mature annually on December 1 through December 1, 2029. Interest at the initial and current rate of 2% to 3% is payable on June 1 and December 1 each year. The bonds are subject to redemption prior to maturity, at the option of the Town, at any time on and after December 1, 2020, at the redemption price, plus accrued interest. The bonds were issued to refund the Series 1997 and 2007 Revenue and Improvement Bonds.

The bonds require the Town to maintain a reserve in the amount of \$164,800. At December 31, 2018, the cash restricted for the bond reserve was \$164,800.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

#### **Debt maturities**

The obligations of the governmental activities mature as follows:

Year Ended				
December 31,	Principal	Interest	Total	
2019	\$ 400,000	\$ 175,069	\$ 575,069	
2020	410,000	163,913	573,913	
2021	415,000	152,200	567,200	
2022	425,000	139,750	564,750	
2023	190,000	127,000	317,000	
2024-2028	1,030,000	546,500	1,576,500	
2029-2033	1,215,000	374,250	1,589,250	
2034-2037	1,160,000	118,000	1,278,000	
	\$ 5,245,000	\$ 1,796,682	\$ 7,041,682	

The obligations of the business-type activities mature as follows:

Year Ended							
December 31,	Principal		_	Interest		_	 Total
2019	\$	120,000		\$	41,188		\$ 161,188
2020		125,000			38,788		163,788
2021		125,000			35,663		160,663
2022		125,000			32,538		157,538
2023		135,000			29,256		164,256
2024-2028		720,000			88,963		808,963

	\$	1,510,000	_	\$	271,196	-	\$ 1,781,196

#### **Debt authorization**

As of December 31, 2018, the Town had no authorized but unissued debt.

#### Note 6 <u>Net Position</u>

The Town has net position consisting of three components -net investment in capital assets, restricted, and unrestricted.

Net investment in capital assets consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of bonds, loans, notes or other borrowings that are attributable to the acquisition, construction, or improvement of those assets.

#### NOTES TO FINANCIAL STATEMENTS (continued)

#### December 31, 2018

As of December 31, 2018, the Town had net investment in capital assets as follows:

	Governmental Activities	Business-type Activities
Capital assets, net	\$ 5,005,029	\$ 22,884,545
Current portion of long-term debt	(413,073)	(122,151)
Long-term debt due in more than one year	(5,002,432)	(1,411,506)
Unspent bond proceeds	3,918,998	-
Net investment in capital assets	\$ 3,508,522	\$ 21,350,888

Restricted position includes net position that is restricted for use either externally imposed by creditors, net grantors, contributors, or laws and regulations of other governments or imposed by law through constitutional provisions or enabling legislation. As of December 31, 2018, the Town had restricted net position as follows:

	 vernmental Activities	Business-type Activities		
Emergency reserves (see Note 13)	\$ 123,000	\$ -		
Conservation trust	110,322	-		
Capital improvements	3,918,998	-		
Bond debt service (see Note 5)	-	164,800		
Restricted net position	\$ 4,152,320	\$ 164,800		

As of December 31, 2018, the Town had a deficit in unrestricted net position of (\$1,500,294) in governmental activities and unrestricted net position in business-type activities of \$10,323,481.

#### Note 7 State Fire and Police Pension Plan (FPPA)

#### **Plan Description**

The Town contributes to the Statewide Defined Benefit Plan, a cost-sharing multiple-employer defined benefit pension plan administered by the Colorado Fire and Police Pension Association (FPPA). The Statewide Defined Benefit Plan (SWDB) provides retirement benefits for members and beneficiaries. Death and disability coverage is provided for members hired prior to January 1, 1997 through the Statewide Death and Disability Plan, which is also administered by the FPPA. This is a noncontributory plan. All full-time, paid police officers of the Town are members of the Statewide Defined Benefit Plan and the Statewide Death and Disability Plan. Local revenue sources are responsible for funding of the Death and Disability benefits for police officers hired on or after January 1, 1997.

Colorado statutes assign the authority to establish benefit provisions to the state legislature. FPPA issues a publicly available annual financial report that includes financial statements and required supplementary information for both the Statewide Defined Benefit Plan and the Statewide Death and Disability Plan. FPPA issues a publicly available comprehensive annual financial report that can be obtained on FPPA's website at http://www.fppaco.org.

#### Benefits Provided

A member is eligible for a normal retirement pension once the member has completed twenty-five years of credited service and has attained the age of 55.

The annual normal retirement benefit is 2 percent of the average of the member's highest three years' base salary for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter. The benefit

### NOTES TO FINANCIAL STATEMENTS (continued)

### December 31, 2018

earned prior to January 1, 2007 for members of affiliated Social Security employers will be reduced by the amount of Social Security income payable to the member annually. Effective January 1, 2007, members currently covered under Social Security will receive half the benefit when compared to the Statewide Defined Benefit Plan. Benefits paid to retired members are evaluated and may be re-determined every October 1. The amount of any increase is based on the Board's discretion and can range from 0 to the higher of 3 percent or the Consumer Price Index.

A member is eligible for an early retirement at age 50 or after 30 years of service. The early retirement benefit equals the normal retirement benefit reduced on an actuarially equivalent basis. Upon termination, an employee may elect to have member contributions, along with 5 percent as interest, returned as a lump sum distribution. Alternatively, a member with at least five years of accredited service may leave contributions with the Plan and remain eligible for a retirement pension at age 55 equal to 2 percent of the member's average highest three years' base salary for each year of credited service up to ten years, plus 2.5 percent for each year of service thereafter.

### Contributions

The Plan sets contribution rates at a level that enables all benefits to be fully funded at the retirement date of all members. Contribution rates for the SWDB plan are set by state statute. Employer contribution rates can only be amended by state statute. Member contribution rates can be amended by state statute or election of the membership. Members of the SWDB plan and their employers contributing at the rate of 9.5 percent and 8 percent, respectively, of base salary for a total contribution rate of 17.5 percent in 2017. In 2014, the members elected to increase the member contribution rate to the SWDB plan beginning in 2015. Member contribution rates will increase 0.5 percent annually through 2022 to a total of 12 percent of base salary. Employer contributions will remain at 8 percent resulting in a combined contribution rate of 20 percent in 2022. Contributions to the SWDB plan from the Town were \$32,494 for the year ended December 31, 2018.

# Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At December 31, 2018, the Town reported an asset of \$90,911 for its proportionate share of the net pension asset. The net pension asset was measured as of December 31, 2017, and the total pension asset used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Town's proportion of the net pension asset was based on the Town's share of contributions to the pension plan relative to the contributions of all participating entities. At December 31, 2017, the Town's proportion was .063191366 percent, which was a decrease of .00234184 percent from its proportion measured as of December 31, 2016.

For the year ended December 31, 2018, the Town recognized a change in pension related accounts of \$98,899. At December 31, 2018, the Town reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources		Deferred of Res	
Differences between actual and expected experience	\$	44,417	\$	31,918
Changes in assumptions		_		_
Net difference between actual and projected earnings on pension plan investments		34,840		_
Contributions subsequent to the measurement date		32,494		_
Total	\$	111,751	\$	31,918

# December 31, 2018

\$32,494 in total reported as deferred outflows of resources related to pension resulting from the Town's contributions subsequent to measurement date will be recognized as a reduction of the net pension liability (or an increase in the Town's net pension asset) in the year ended December 31, 2018. Other amounts reported as deferred outflows and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended December 31,	Amount		
2019	\$	43,220	
2020		9,320	
2021		(3,800)	
2022		(8,618)	
2023		9,659	
Thereafter		(2,442)	
	\$	47,339	

#### **Actuarial Assumptions**

The total pension liability in the December 31, 2017 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial Method	Entry Age Normal
Amortization Method	Level % of Payroll, Open
Amortization Period	30 years
Long-term Investment Rate of Return*	7.5%
Projected Salary Increases*	4.0 - 14.0%
Cost of Living Adjustments (COLA)	0.0%

\*Includes Inflation at 2.5%

Effective January 1, 2016, the post-retirement mortality tables for non-disabled retirees is a blend of the Annuitant and Employee RP-2014 generational mortality tables with blue collar adjustment projected with Scale BB. The occupationally disabled post-retirement mortality assumption uses the same table as used for healthy annuitants, except there is a three year set-forward, meaning a disabled member age 70 will be valued as if they were a 73 year old healthy retiree. The totally disabled post-retirement mortality assumption uses the RP-2014 generational mortality tables for disabled annuitants, except an additional provision to apply a minimum 3% mortality probability to males and 2% mortality probability for females is included to reflect substantial impairment for this population. The pre-retirement off-duty mortality tables are adjusted to 55% of the RP-2014 mortality tables for active employees. The on-duty mortality rate is 0.00020.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the Fund's target asset allocation as of December 31, 2017 are summarized in the following table:

# December 31, 2018

		Long-Term Expected
Asset Class	Target Allocation	Real Rate of Return
Global Equity	37.00%	8.33%
Equity Long/Short	9.00%	7.15%
Illiquid Alternatives	24.00%	9.70%
Fixed Income	15.00%	3.00%
Absolute Return	9.00%	6.46%
Managed Futures	4.00%	6.85%
Cash	2.00%	2.26%
Total	100.00%	

### Discount rate

The discount rate used to measure the total pension liability was 7.50 percent. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the FPPA Board's funding policy, which establishes the contractually required rates under Colorado statutes. Based on those assumptions, the SWDB plan fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

# Sensitivity of the Town's proportionate share of the net pension liability / (asset) to changes in the discount rate

The following presents the Town's proportionate share of the net pension liability (asset) calculated using the discount rate of 7.50 percent, as well as what the Town's proportionate share of the net pension liability (asset) would be if it were calculated using a discount rate that is 1-percentage-point lower (6.50 percent) or 1-percentage-point higher (8.50 percent) than the current rate:

	1.00%	Current	1.00%
	Decrease	Discount	Increase
	(6.50%)	Rate	(8.50%)
Town's proportionate share of the net pension liability (asset)	\$ 109,893	\$ (90,911)	\$ (106,675)

# Pension plan fiduciary net position

Detailed information about the pension plan's fiduciary net position is available in the FPPA's comprehensive annual report which can be obtained at <u>www.fppaco.org</u>.

#### Changes between the measurement date of the net pension asset and December 31, 2018

The FPPA Board completed an actuarial experience study and approved changes to the actuarial assumptions effective January 1, 2019. The inflation assumption will remain at 2.5 percent. The investment return assumption will be reduced from 7.5 percent to 7.0 percent to reflect the reduced real return expected from recent capital market data. The reduction in the investment return assumption will increase the total pension liability.

#### NOTES TO FINANCIAL STATEMENTS (continued)

# December 31, 2018

#### Note 8 Defined Benefit Pension Plan – PERA, Non-police staff

Eligible employees of the Town are provided with pensions through the Local Government Division Trust Fund (LGDTF)—a cost-sharing multiple-employer defined benefit pension plan administered by PERA. Plan benefits are specified in Title 24, Article 51 of the Colorado Revised Statutes (C.R.S.), administrative rules set forth at 8 C.C.R. 1502-1, and applicable provisions of the federal Internal Revenue Code.

Colorado State law provisions may be amended from time to time by the Colorado General Assembly. PERA issues a publicly available comprehensive annual financial report that can be obtained at <a href="http://www.copera.org/investments/pera-financial-reports">www.copera.org/investments/pera-financial-reports</a>.

#### Benefits provided

PERA provides retirement, disability, and survivor benefits. Retirement benefits are determined by the amount of service credit earned and/or purchased, highest average salary, the benefit structure(s) under which the member retires, the benefit option selected at retirement, and age at retirement. Retirement eligibility is specified in tables set forth at C.R.S. § 24-51-602, 604, 1713, and 1714.

The lifetime retirement benefit for all eligible retiring employees under the PERA Benefit Structure is the greater of the:

- Highest average salary multiplied by 2.5 percent and then multiplied by years of service credit
- The value of the retiring employee's member contribution account plus a 100 percent match on eligible amounts as of the retirement date. This amount is then annuitized into a monthly benefit based on life expectancy and other actuarial factors.

In all cases, the service retirement benefit is limited to 100% of highest average salary and also cannot exceed the maximum benefit allowed by federal Internal Revenue Code

Members may elect to withdraw their member contribution accounts upon termination of employment with all PERA employers; waiving rights to any lifetime retirement benefits earned. If eligible, the member may receive a match of either 50 percent or 100 percent on eligible amounts depending on when contributions were remitted to PERA, the date employment was terminated, whether 5 years of service credit has been obtained and the benefit structure under which contributions were made.

As of December 31, 2017, benefit recipients who elect to receive a lifetime retirement benefit are generally eligible to receive post-retirement cost-of-living adjustments (COLAs), referred to as annual increase in the C.R.S. Benefit recipients under the PERA benefit structure who began eligible employment before January 1, 2007 receive an annual increase of 2 percent, unless PERA has a negative investment year, in which case the annual increase for the next three years is the lesser of 2 percent or the average of the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) for the prior calendar year. Benefit recipients under the PERA benefit structure who began eligible employment after January 1, 2007, receive an annual increase of the lesser of 2 percent or the average CPI-W for the prior calendar year, not to exceed 10 percent of PERA's Annual Increase Reserve for the LGDTF.

Disability benefits are available for eligible employees once they reach five years of earned service credit and are determined to meet the definition of disability. The disability benefit amount is based on the retirement benefit formula shown above considering a minimum 20 years of service credit, if deemed disabled.

Survivor benefits are determined by several factors, which include the amount of earned service credit, highest average salary of the deceased, the benefit (structure(s) under which service credit was obtained, and the qualified survivor(s) who will receive the benefits.

# December 31, 2018

### Contributions

Eligible employees and the Town are required to contribute to the LGDTF at a rate set by Colorado statute. The contribution requirements are established under C.R.S. § 24-51-401, *et seq.* Eligible employees are required to contribute 8 percent of their PERA-includable salary. The employer contribution requirements are summarized in the table below:

	For the Year Ended December 31, 2017	For the Year Ended December 31, 2018
Employer Contribution Rate* Amount of Employer Contribution Apportioned to the Health Care Trust	10.00%	10.00%
Fund as specified in C.R.S. § 24-51-	(1.00)0/	(1.00)0/
208(1)(f)*	(1.02)%	(1.02)%
Amount Apportioned to LGDTF* Amortization Equalization Disbursement	8.98%	8.98%
(AED) as specified in C.R.S. § 24-51-411* Supplemental Amortization Equalization Disbursement (SAED) as specified in	2.20%	2.20%
C.R.S. § 24-51-411*	1.50%	1.50%
Total Employer Contribution Rate to the LGDTF*	12.68%	12.68%

\* Rates are expressed as a percentage of salary as defined in C.R.S. § 24-51-101(42).

Employer contributions are recognized by the LGDTF in the period in which the compensation becomes payable to the member and the Town is statutorily committed to pay the contributions to the LGDTF. Employer contributions recognized by the LGDTF from the Town were \$73,329 for the year ended December 31, 2018.

# Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources

At December 31, 2018, the Town reported a liability of \$1,073,973 for its proportionate share of the net pension liability. The net pension liability was measured as of December 31, 2017, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of December 31, 2016.

Standard update procedures were used to roll forward the total pension liability to December 31, 2017. The Town's proportion of the net pension liability was based on Town contributions to the LGDTF for the calendar year 2017 relative to the total contributions of participating employers to the LGDTF.

At December 31, 2017, the Town's proportion was .0964562962 percent, which was an increase of .0153295136 percent from its proportion measured as of December 31, 2016.

For the year ended December 31, 2018, the Town recognized PERA pension expense of \$216,929. At December 31, 2018, the Town reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

# December 31, 2018

	d Outflows sources	Deferred Inflows of Resources		
Difference between Expected and Actual Experience	\$ 67,187	\$	_	
Changes of Assumptions of other Inputs	11,345		_	
Net Difference between Projected and Actual				
Earnings on Pension Plan Investments	_		208,755	
Changes in Proportion and Differences between				
Contributions Recognized and Proportionate				
Share of Contributions	155,651		-	
Contributions Subsequent to Measurement Date	73,329			
Total	\$ 307,512	\$	208,755	

\$73 329 reported as deferred outflows of resources related to pensions, resulting from contributions subsequent to the measurement date, will be recognized as a reduction of the net pension liability in the year ended December 31, 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ended December 31,	Amount		
2019	\$	207,255	
2020		(14,899)	
2021		(75,919)	
2022		(77,406)	
2023		(13,603)	
	\$	25,428	

# Actuarial assumptions

The December 31, 2016 actuarial valuation used the following actuarial cost method, actuarial assumptions, and other inputs:

Actuarial Cost Method	Entry Age
Price Inflation	2.40%
Real Wage Growth	1.10%
Wage Inflation	3.50%
Salary Increases, Including Wage Inflation	3.50 – 10.45%
Long-Term Investment Rate of Return, Net of	
Pension Plan Investment Expenses,	
Including Price Inflation	7.25%
Discount Rate	7.25%
Future Post Retirement Benefit Increases:	
PERA Benefit Structure Hire Prior to January 1,	
2007 and DPS Benefit Structure (Automatic)	2.00%
PERA Benefit Structure Hire After December	Finance by the Annual
31, 2006 (Ad Hoc, Substantively Automatic)	Increase Reserve

Healthy mortality assumptions for active members reflect the RP-2014 White Collar Employee Mortality Table, a table specifically developed for actively working people. To allow for an appropriate margin of improved mortality prospectively, the mortality rates incorporate a 70 percent factor applied to male rates and a 55 percent factor applied to female rates.

#### NOTES TO FINANCIAL STATEMENTS (continued)

### December 31, 2018

Healthy, post-retirement mortality assumptions reflect the RP-2014 White Collar Healthy Annuitant Mortality Table, adjusted as follows:

- Males: Mortality improvement projected to 2018 using the MP-2015 projection scale, a 73 percent factor applied to rates for ages less than 80, a 108 percent factor applied to rates for ages 80 and above, and further adjustments for credibility.
- Females: Mortality improvement projected to 2020 using the MP-2015 projection scale, a 78 percent factor applied to rates for ages less than 80, a 109 percent factor applied to rates for ages 80 and above, and further adjustments for credibility.

The mortality assumption for disabled retirees was based on 90 percent of the RP-2014 Disabled Retiree Mortality Table.

The actuarial assumptions used in the December 31, 2016 valuation were based on the results of the 2016 experience analysis for the periods January 1, 2012 through December 31, 2015, as well as, the October 28, 2016 actuarial assumptions workshop and were adopted by PERA's Board during the November 18, 2016 Board meeting.

The long-term expected return on plan assets is reviewed as part of regular experience studies prepared every four or five years for PERA. Recently, this assumption has been reviewed more frequently. The most recent analyses were outlined in presentations to PERA's Board on October 28, 2016.

Several factors were considered in evaluating the long-term rate of return assumption for the LGDTF, including long-term historical data, estimates inherent in current market data, and a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected return, net of investment expense and inflation) were developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation.

As of the most recent adoption of the long-term expected rate of return by the PERA Board, the target asset allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

	Target	30-Year Expected Geometric Real
Asset Class	Allocation	Rate of Return
U.S. Equity – Large Cap	21.20%	4.30%
U.S. Equity – Small Cap	7.42%	4.80%
Non U.S. Equity – Developed	18.55%	5.20%
Non U.S. Equity – Emerging	5.83%	5.40%
Core Fixed Income	19.32%	1.20%
High Yield	1.38%	4.30%
Non U.S. Fixed Income – Developed	1.84%	0.60%
Emerging Market Debt	0.46%	3.90%
Core Real Estate	8.50%	4.90%
Opportunity Fund	6.00%	3.80%
Private Equity	8.50%	6.60%
Cash	1.00%	0.20%
Total	100.00%	

#### NOTES TO FINANCIAL STATEMENTS (continued)

# December 31, 2018

In setting the long-term expected rate of return, projections employed to model future returns provide a range of expected long-term returns that, including expected inflation, ultimately support a long-term expected rate of return assumption of 7.25%.

#### Discount rate

The discount rate used to measure the total pension liability was 7.25%. The projection of cash flows used to determine the discount rate applied the actuarial cost method and assumptions shown above. In addition, the following methods and assumptions were used in the projection of cash flows:

- Total covered payroll for the initial projection year consists of the covered payroll of the active membership present on the valuation date and the covered payroll of future plan members assumed to be hired during the year. In subsequent projection years, total covered payroll was assumed to increase annually at a rate of 3.50%.
- Employee contributions were assumed to be made at the current member contribution rate as of the measurement date. Employee contributions for future plan members were used to reduce the estimated amount of total service costs for future plan members.
- Employer contributions were assumed to be made at rates equal to the fixed statutory rates specified in law and effective as of the measurement date, including current and estimated future AED and SAED, until the Actuarial Value Funding Ratio reaches 103%, at which point, the AED and SAED will each drop 0.50% every year until they are zero. Additionally, estimated employer contributions included reductions for the funding of the AIR and retiree health care benefits. For future plan members, employer contributions were further reduced by the estimated amount of total service costs for future plan members not financed by their member contributions.
- Employer contributions and the amount of total service costs for future plan members were based upon a process used by the plan to estimate future actuarially determined contributions assuming an analogous future plan member growth rate.
- The AIR balance was excluded from the initial fiduciary net position, as, per statute, AIR amounts cannot be used to pay benefits until transferred to either the retirement benefits reserve or the survivor benefits reserve, as appropriate. As the ad hoc post-retirement benefit increases financed by the AIR are defined to have a present value at the long-term expected rate of return on plan investments equal to the amount transferred for their future payment, AIR transfers to the fiduciary net position and the subsequent AIR benefit payments have no impact on the single equivalent interest rate (SEIR) determination process when the timing of AIR cash flows is not a factor (i.e., the plan's fiduciary net position is not projected to be depleted). When AIR cash flow timing is a factor in the SEIR determination process (i.e., the plan's fiduciary net position is projected to be depleted), AIR transfers to the fiduciary net position and the subsequent AIR subsequent AIR benefit payments were estimated and included in the projections
- Benefit payments and contributions were assumed to be made at the end of the month.

Based on the above assumptions and methods, the LGDTF's fiduciary net position was projected to be available to make all projected future benefit payments of current members. Therefore, the long-term expected rate of return of 7.25 percent on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The discount rate determination does not use the municipal bond index rate, and therefore, the discount rate is 7.25 percent. There was no change in the discount rate from the prior measurement date.

#### NOTES TO FINANCIAL STATEMENTS (continued)

# December 31, 2018

#### Sensitivity of the Town's proportionate share of the net pension liability to changes in the discount rate

The following presents the proportionate share of the net pension liability calculated using the discount rate of 7.25 percent, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.25 percent) or 1-percentage-point higher (8.25 percent) than the current rate:

				Current		
	1%	6 Decrease	Dis	scount Rate	1%	Increase
		(6.25%)		(7.25%)		(8.25%)
Proportionate Share of Net Pension Liability	\$	1,709,765	\$	1,073,973	\$	543,430

### Pension plan fiduciary net position

Detailed information about the LGDTF's fiduciary net position is available in PERA's comprehensive annual financial report which can be obtained at <u>www.copera.org/investments/pera-financial-reports</u>.

#### Changes between the measurement date of the net pension liability and December 31, 2018

During the 2018 legislative session, the Colorado General Assembly passed significant pension reform through SB 18-200: *Concerning Modifications to the Public Employees' Retirement Association Hybrid Defined Benefit Plan Necessary to Eliminate with a High Probability the Unfunded Liability of the Plan Within the Next Thirty Years*. The bill was signed into law by Governor Hickenlooper on June 4, 2018. SB 18-200 makes changes to the plans administered by PERA with the goal of eliminating the unfunded actuarial accrued liability the Division Trust Funds and thereby reach a 100 percent funded ratio for each division within the next 30 years.

A brief description of some of the major changes to plan provisions required by SB 18-200 are listed below. A full copy of the bill can be found online at <u>www.leg.colorado.gov</u>.

- Increases employee contribution rates by a total of 2 percent (to be phased in over a period of 3 years starting on July 1, 2019).
- Modifies the retirement benefits, including temporarily suspending and reducing the annual increase for all current and future retirees, modifying the highest average salary for employees with less than five years of service credit on December 31, 2019 and raises the retirement age for new employees.
- Member contributions, employer contributions, the direct distribution from the state, and the annual increases will be adjusted based on certain statutory parameters beginning July 1, 2020, and then each year thereafter, to help keep PERA on path to full funding in 30 years.

At December 31, 2018, the Town reported a liability of \$1,073,973 for its proportionate share of the net pension liability which was measured using the plan provisions in effect as of the pension plan's year-end based on a discount rate of 7.25 percent. For comparative purposes, the following schedule presents an estimate of what the Town's proportionate share of the net pension liability and associated discount rate would have been had the provisions of SB 18-200, applicable to the LGDTF, become law on December 31, 2017. This pro forma information was prepared using the fiduciary net position of the LGDTF as of December 31, 2017. Future net pension liabilities reported could be materially different based on changes in investment markets, actuarial assumptions, plan experience and other factors.

# December 31, 2018

	Proportionate Share of the
	Estimated Net Pension Liability
Estimated Discount Rate Calculated Using Plan	Calculated Using Plan Provisions
Provisions Required by SB 18-200 (pro forma)	Required by SB 18-200 (pro forma)
7.25%	\$ 760,373

### Note 9 Postemployment Benefits Other Than Pensions

### **Plan Description**

Eligible employees of the Town are provided with OPEB through the Health Care Trust Fund (HCTF) - a cost-sharing multiple-employer defined benefit other postemployment benefit (OPEB) plan administered by PERA. The HCTF is established under Title 24, Article 51, Part 12 of the Colorado Revised Statutes (C.R.S.), as amended. Colorado State law provisions may be amended from time to time by the Colorado General Assembly. Title 24, Article 51, Part 12 of the C.R.S., as amended, sets forth a framework that grants authority to the PERA Board to contract, self-insure, and authorize disbursements necessary in order to carry out the purposes of the PERACare program, including the administration of the premium subsidies. PERA issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at <u>www.copera.org</u>.

### **Benefits Provided**

The HCTF provides a health care premium subsidy to eligible participating PERA benefit recipients and retirees who choose to enroll in one of the PERA health care plans, however, the subsidy is not available if only enrolled in the dental and/or vision plan(s). The health care premium subsidy is based upon the benefit structure under which the member retires and the member's years of service credit. For members who retire having service credit with employers in the Denver Public Schools (DPS) Division and one or more of the other four divisions (State Division, School Division, Local Government Division and Judicial Division Trust Funds), the premium subsidy is allocated between the HCTF and the Denver Public Schools Health Care Trust Fund (DPS HCTF). The basis for the amount of the premium subsidy funded by each trust fund is the percentage of the member contribution account balance from which the retirement benefit is paid.

C.R.S. § 24-51-1202 et seq. specifies the eligibility for enrollment in the health care plans offered by PERA and the amount of the premium subsidy. The law governing a benefit recipient's eligibility for the subsidy and the amount of the subsidy differs slightly depending under which benefit structure the benefits are calculated. All benefit recipients under the PERA benefit structure and all retirees under the DPS benefit structure are eligible for a premium subsidy, if enrolled in a health care plan under PERACare. Upon the death of a DPS benefit structure retiree, no further subsidy is paid.

Eligibility to enroll in PERACare is voluntary and includes, among others, benefit recipients and their eligible dependents, as well as certain surviving spouses, divorced spouses and guardians. Eligible benefit recipients may enroll into the program upon retirement, upon the occurrence of certain life events, or on an annual basis during an open enrollment period.

# December 31, 2018

# PERA Benefit Structure

The maximum service-based premium subsidy is \$230 per month for benefit recipients who are under 65 years of age and who are not entitled to Medicare; the maximum service-based subsidy is \$115 per month for benefit recipients who are 65 years of age or older or who are under 65 years of age and entitled to Medicare. The basis for the maximum service-based subsidy, in each case, is for benefit recipients with retirement benefits based on 20 or more years of service credit. There is a 5 percent reduction in the subsidy for each year less than 20. The benefit recipient pays the remaining portion of the premium to the extent the subsidy does not cover the entire amount.

For benefit recipients who have not participated in Social Security and who are not otherwise eligible for premium-free Medicare Part A for hospital-related services, C.R.S. § 24-51-1206(4) provides an additional subsidy. According to the statute, PERA cannot charge premiums to benefit recipients without Medicare Part A that are greater than premiums charged to benefit recipients with Part A for the same plan option, coverage level, and service credit. Currently, for each individual PERACare enrollee, the total premium for Medicare coverage is determined assuming plan participants have both Medicare Part A and Part B and the difference in premium cost is paid by the HCTF or the DPS HCTF on behalf of benefit recipients not covered by Medicare Part A.

### Contributions

Pursuant to Title 24, Article 51, Section 208(1)(f) of the C.R.S., as amended, certain contributions are apportioned to the HCTF. PERA-affiliated employers of the State, School, Local Government, and Judicial Divisions are required to contribute at a rate of 1.02 percent of PERA-includable salary into the HCTF.

Employer contributions are recognized by the HCTF in the period in which the compensation becomes payable to the member and the Town is statutorily committed to pay the contributions. Employer contributions recognized by the HCTF from the Town were \$5,903 for the year ended December 31, 2018.

# OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

At December 31, 2018 the Town reported a liability of \$97,406 for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of December 31, 2017, and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as of December 31, 2016. Standard update procedures were used to roll forward the total OPEB liability to December 31, 2017. The Town's proportion of the net OPEB liability was based on the Town's contributions to the HCTF for the calendar year 2017 relative to the total contributions of participating employers to the HCTF. At December 31, 2017, the Town's proportion was .0074951007 percent, which was an increase of .001267522 percent from its proportion measured as of December 31, 2016.

For the year ended December 31, 2018, the Town recognized OPEB expense of (\$16,203). At December 31, 2018, the Town reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

# December 31, 2018

	Outflows ources	 d Inflows sources
Difference between Expected and Actual Experience	\$ 461	\$ _
Net Difference between Projected and Actual		
Earnings on OPEB Plan Investments	-	1,629
Changes in Proportion and Differences between		
Contributions Recognized and Proportionate		
Share of Contributions	13,735	_
Contributions Subsequent to Measurement Date	5,903	
Total	\$ 20,099	\$ 1,629

\$5,903 reported as deferred outflows of resources related to OPEB resulting from Town contributions subsequent to the measurement date will be recognized as a reduction in the net OPEB liability in the year ended December 31, 2019. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ended December 31,	Amount		
2019	\$	8,285	
2020		2,382	
2021		2,382	
2022		(317)	
2023		91	
Thereafter		(257)	
	\$	12,566	

# **Actuarial assumptions**

The total OPEB liability in the December 31, 2016 actuarial valuation was determined using the following actuarial assumptions and other inputs:

Actuarial Cost Method Price Inflation Real Wage Growth	Entry Age 2.40% 1.10%
Wage Inflation	3.50%
Salary Increases, Including Wage Inflation	3.50% in the aggregate
Long-Term Investment Rate of Return, Net of	
OPEB Investment Expenses, Including Price	
Inflation	7.25%
Discount Rate	7.25%
Health Care Cost Trend Rates:	
Service-based Premium Subsidy	0.00%
PERACare Medicare Plans	5.00%
Medicare Part A Premiums	3.00% for 2017,
	gradually rising to 4.25%
	in 2023

Calculations are based on the benefits provided under the terms of the substantive plan in effect at the time of each actuarial valuation and on the pattern of sharing of costs between employers of each fund to that point.

#### NOTES TO FINANCIAL STATEMENTS (continued)

### December 31, 2018

Health care cost trend rates reflect the change in per capita health costs over time due to factors such as medical inflation, utilization, plan design, and technology improvements. For the PERA benefit structure, health care cost trend rates are needed to project the future costs associated with providing benefits to those PERACare enrollees not eligible for premium-free Medicare Part A.

Health care cost trend rates for the PERA benefit structure are based on published annual health care inflation surveys in conjunction with actual plan experience (if credible), building block models and heuristics developed by health plan actuaries and administrators, and projected trends for the Federal Hospital Insurance Trust Fund (Medicare Part A premiums) provided by the Centers for Medicare & Medicaid Services. Effective December 31, 2016, the health care cost trend rates for Medicare Part A premiums were revised to reflect the current expectation of future increases in rates of inflation applicable to Medicare Part A premiums.

The PERA benefit structure health care cost trend rates that were used to measure the total OPEB liability are summarized in the table below:

	PERACare	Medicare Part A
Year	Medicare Plans	Premiums
2017	5.00%	3.00%
2018	5.00%	3.25%
2019	5.00%	3.50%
2020	5.00%	3.75%
2021	5.00%	4.00%
2022	5.00%	4.00%
2023	5.00%	4.25%
2024+	5.00%	4.25%

Mortality assumptions for the determination of the total pension liability for each of the Division Trust Funds as shown below are applied, as applicable, in the determination of the total OPEB liability for the HCTF. Affiliated employers of the State, School, Local Government, and Judicial Divisions participate in the HCTF.

Healthy mortality assumptions for active members were based on the RP-2014 White Collar Employee Mortality Table, a table specifically developed for actively working people. To allow for an appropriate margin of improved mortality prospectively, the mortality rates incorporate a 70 percent factor applied to male rates and a 55 percent factor applied to female rates.

Healthy, post-retirement mortality assumptions for the State and Local Government Divisions were based on the RP-2014 Healthy Annuitant Mortality Table, adjusted as follows:

- **Males:** Mortality improvement projected to 2018 using the MP-2015 projection scale, a 73 percent factor applied to rates for ages less than 80, a 108 percent factor applied to rates for ages 80 and above, and further adjustments for credibility.
- **Females:** Mortality improvement projected to 2020 using the MP-2015 projection scale, a 78 percent factor applied to rates for ages less than 80, a 109 percent factor applied to rates for ages 80 and above, and further adjustments for credibility.

Healthy, post-retirement mortality assumptions for the School and Judicial Divisions were based on the RP-2014 White Collar Healthy Annuitant Mortality Table, adjusted as follows:

• **Males:** Mortality improvement projected to 2018 using the MP-2015 projection scale, a 93 percent factor applied to rates for ages less than 80, a 113 percent factor applied to rates for ages 80 and above, and further adjustments for credibility.

### NOTES TO FINANCIAL STATEMENTS (continued)

# December 31, 2018

• **Females:** Mortality improvement projected to 2020 using the MP-2015 projection scale, a 68 percent factor applied to rates for ages less than 80, a 106 percent factor applied to rates for ages 80 and above, and further adjustments for credibility.

The mortality assumption for disabled retirees was based on 90 percent of the RP-2014 Disabled Retiree Mortality Table.

The following economic and demographic assumptions were specifically developed for, and used in, the measurement of the obligations for the HCTF:

- The assumed rates of PERACare participation were revised to reflect more closely actual experience.
- Initial per capita health care costs for those PERACare enrollees under the PERA benefit structure who are expected to attain age 65 and older ages and are not eligible for premium-free Medicare Part A benefits were updated to reflect the change in costs for the 2017 plan year.
- The percentages of PERACare enrollees who will attain age 65 and older ages and are assumed to not qualify for premium-free Medicare Part A coverage were revised to more closely reflect actual experience.
- The percentage of disabled PERACare enrollees who are assumed to not qualify for premium-free Medicare Part A coverage were revised to reflect more closely actual experience.
- Assumed election rates for the PERACare coverage options that would be available to future PERACare
  enrollees who will qualify for the "No Part A Subsidy" when they retire were revised to more closely reflect
  actual experience.
- Assumed election rates for the PERACare coverage options that will be available to those current PERACare enrollees, who qualify for the "No Part A Subsidy" but have not reached age 65, were revised to more closely reflect actual experience.
- The health care cost trend rates for Medicare Part A premiums were revised to reflect the then current expectation of future increases in rates of inflation applicable to Medicare Part A premiums.
- The rates of PERAcare coverage election for spouses of eligible inactive members and future retirees were revised to more closely reflect actual experience.
- The assumed age differences between future retirees and their participating spouses were revised to reflect more closely actual experience.

The actuarial assumptions used in the December 31, 2016, valuations were based on the results of the 2016 experience analysis for the periods January 1, 2012, through December 31, 2015, as well as, the October 28, 2016, actuarial assumptions workshop and were adopted by the PERA Board during the November 18, 2016, Board meeting. In addition, certain actuarial assumptions pertaining to per capita health care costs and their related trends are analyzed and reviewed by PERA's actuary, as needed.

The long-term expected return on plan assets is reviewed as part of regular experience studies prepared every four of five years for PERA. Recently, this assumption has been reviewed more frequently. The most recent analyses were outlined in presentations to PERA's Board on October 28, 2016.

Several factors were considered in evaluating the long-term rate of return assumption for the HCTF, including long-term historical data, estimates inherent in current market data, and a log-normal distribution analysis in which

# December 31, 2018

best-estimate ranges of expected future real rates of return (expected return, net of investment expense and inflation) were developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation.

As of the most recent adoption of the long-term expected rate of return by the PERA Board, the target asset allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

		30-Year Expected
	Target	Geometric Real
Asset Class	Allocation	Rate of Return
U.S. Equity – Large Cap	21.20%	4.30%
U.S. Equity – Small Cap	7.42%	4.80%
Non U.S. Equity – Developed	18.55%	5.20%
Non U.S. Equity – Emerging	5.83%	5.40%
Core Fixed Income	19.32%	1.20%
High Yield	1.38%	4.30%
Non U.S. Fixed Income – Developed	1.84%	0.60%
Emerging Market Debt	0.46%	3.90%
Core Real Estate	8.50%	4.90%
Opportunity Fund	6.00%	3.80%
Private Equity	8.50%	6.60%
Cash	1.00%	0.20%
Total	100.00%	

In setting the long-term expected rate of return, projections employed to model future returns provide a range of expected long-term returns that, including expected inflation, ultimately support a long-term expected rate of return assumption of 7.25 percent.

# Sensitivity of the Town's proportionate share of the net OPEB liability to changes in the healthcare cost trend rates

The following presents the Town's proportionate share of the net OPEB liability, as well as what the Town's proportionate share of the net OPEB liability would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher than the current healthcare cost trend rates:

	1% Decrease Current in Trend Rates Trend Rates				1% Increase in Trend Rates			
PERACare Medicare Trend Rate	4	.00%	5	5.00%	6.00%			
Initial Medicare Part A Trend Rate	2.00%		3.00%			4.00%		
Ultimate Medicare Part A Trend Rate	3.25%		3.25% 4.25%			5.25%		
Proportionate Share of the Net OPEB Liability	\$	94,727	\$	97,406	\$	100,630		

# **Discount Rate**

The discount rate used to measure the total OPEB liability was 7.25 percent. The projection of cash flows used to determine the discount rate applied the actuarial cost method and assumptions shown above. In addition, the following methods and assumptions were used in the projection of cash flows:

• Updated health care cost trend rates for Medicare Part A premiums as of the December 31, 2017, measurement date.

### NOTES TO FINANCIAL STATEMENTS (continued)

# December 31, 2018

- Total covered payroll for the initial projection year consists of the covered payroll of the active membership present on the valuation date and the covered payroll of future plan members assumed to be hired during the year. In subsequent projection years, total covered payroll was assumed to increase annually at a rate of 3.50 percent.
- Employer contributions were assumed to be made at rates equal to the fixed statutory rates specified in law and effective as of the measurement date. For future plan members, employer contributions were reduced by the estimated amount of total service costs for future plan members.
- Employer contributions and the amount of total service costs for future plan members were based upon a process used by the plan to estimate future actuarially determined contributions assuming an analogous future plan member growth rate.
- Transfers of a portion of purchase service agreements intended to cover the costs associated with OPEB benefits were estimated and included in the projections.
- Benefit payments and contributions were assumed to be made at the end of the month.

Based on the above assumptions and methods, the HCTF's fiduciary net position was projected to be available to make all projected future benefit payments of current members. Therefore, the long-term expected rate of return of 7.25 percent on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability. The discount rate determination does not use the municipal bond index rate. There was no change in the discount rate from the prior measurement date.

#### Sensitivity of the Town's proportionate share of the net OPEB liability to changes in the discount rate

The following presents the Town's proportionate share of the net OPEB liability, as well as what the Town's proportionate share of the net OPEB liability would be if it were calculated using a discount rate that is 1 percentage-point lower (6.25 percent) or 1-percentage-point higher (8.25 percent) than the current discount rate:

	Current						
	1% Decrease			ount Rate	1% Increase		
	(	6.25%)	(7.25%)		3)	8.25%)	
Proportionate Share of Net OPEB Liability	\$	109,514	\$	97,406	\$	87,071	

#### OPEB plan fiduciary net position

Detailed information about the HCTF plan's fiduciary net position is available in the separately issued comprehensive annual financial report issued by PERA. That report can be obtained at <a href="http://www.copera.org/investments/pera-financial-reports">www.copera.org/investments/pera-financial-reports</a>.

# Note 10 Defined Contribution Plan

Employees of the Town who are members of LGDTF (see Note 8) may voluntarily contribute to the PERA Plus 457 Plan (457 Plan), an Internal Revenue Code Section 457 defined contribution plan administered by PERA. Plan participation is voluntary, and contributions are separate from other contributions made to PERA. PERA issues a publicly available comprehensive annual financial report for the 457 Plan. That report may be obtained at www.copera.org/investments/pera-financial-reports.

The 457 Plan is funded by voluntary member contributions of up to maximum limit set by the IRS (\$18,500 for 2018). Catch-up contributions of up to \$6,000 are allowed for participants who had attained the age of 50 before the close of the plan year. Plan member contributions to the 457 Plan were \$55,947 for 2018.

# December 31, 2018

### Note 11 Intergovernmental Agreements

#### **Economic Development Incentive Agreement**

The Town entered into an Economic Development Incentive Agreement, effective December 2, 2009, with a developer of a retail center to be built within the Town limits. Pursuant to the agreement, the Town is required to deposit a portion of the sales tax that it receives on behalf of the retail center, as calculated below, into a Tax Allocation Fund.

Revenue Sharing Periods	Percentage Allocation
Period 1: 1 <sup>st</sup> 12 months of receipt of Project Tax Revenue	50%
Period 2: 2 <sup>nd</sup> 12 month period thereafter	50%
Period 3: 3 <sup>rd</sup> 12 month period thereafter	40%
Period 4: 4 <sup>th</sup> 12 month period thereafter	30%

The Town will reimburse the developer, to the extent of the Tax Allocation Fund, for any cost associated with public improvements. As of December 31, 2018, no deposits had been made to the Tax Allocation Fund.

### Henry Reservoir Agreement

On December 23, 2013, the Town entered into an agreement with Sand Hills Metropolitan District (the District), for purposes of restoration of the Henry Reservoir. The District contributed \$1,350,000 (the Funds) to the Town, based on a preliminary report prepared by the District, for purposes of repairing and restoring the Reservoir and the surrounding area. The Town was required to advertise and/or award a public contract for construction of repairs prior to June 1, 2017. If the Town failed to award a contract for repairs by that date, any unspent funds were required to be returned to the District. All repairs were to be completed to a level which meets water storage obligations owed to the Farmers Reservoir and Irrigation Company (FRICO), who owns the land that included the Reservoir. The Town was required to submit evidence of costs of construction to the District as funds were spent. The Town was responsible for costs in excess of \$1,350,000, however the Town could have retained unspent funds after construction was complete.

In 2014, the Town was added as a defendant to an amended complaint (the Complaint) filed against the Town, the District, a Water and Sanitation District, Weld County, and the State of Colorado. Weld County and the State of Colorado were subsequently dismissed from the lawsuit. The plaintiffs asserted that the Town exceeded its jurisdiction and abused its discretion in approving an amended service plan for the District. The complaint asked the Court to issue a preliminary and permanent injunction against the Town and the Water and Sanitation District, asking each to return funds received from the District. On March 19, 2015, the trial court entered an order of summary judgment motions in favor of the plaintiff, but not addressing the Funds. The District filed an appeal to the Colorado Court of Appeals. In 2016, the Court of Appeals held that the District did not have proper authority to amend its service plan, and therefore did not have taxing authority. As a result of final resolution of the complaint, the Town paid \$1,356,014 back to the District during 2018.

# Note 12 Risk Management

The Town is a member of the Colorado Intergovernmental Risk Sharing Agency (CIRSA), a joint self-insurance pool created by intergovernmental agreement of over 200 municipalities to provide property, general and automobile liability, and public officials' coverage to its members. CIRSA is governed by a seven-member board elected by and from among its members. Coverage is provided through pooling of self-insured losses and the purchase of excess insurance coverage. CIRSA has a legal obligation for claims against its members to the extent that funds are available in its annually established loss fund and those amounts available from insurance

# December 31, 2018

providers under excess specific and aggregate insurance contracts. Losses incurred in excess of loss funds and amounts recoverable from excess insurance are direct liabilities of the participating members. CIRSA has indicated that any excess losses would be billed to members in proportion to their contributions in the year such excess occurs, although it is not required to do so.

The Town has not been informed of any excess losses that may have been incurred by the pool for the past three years.

# Note 13 Tax, Spending, and Debt Limitation

Article X, Section 20 of the Colorado constitution, commonly known as the Taxpayer's Bill of Rights (TABOR) contains tax, spending, revenue and debt limitations which apply to the State of Colorado and all local governments.

Enterprises, defined as government-owned businesses authorized to issue revenue bonds and receiving less than 10% of annual revenue in grants from all state and local governments combined, are excluded from the provisions of TABOR. The Town's management believes the Enterprise funds of the Town qualify for this exclusion.

Spending and revenue limits are determined based on the prior year's fiscal year spending as adjusted for allowable increases for inflation and local growth. Fiscal year spending is generally defined as expenditures plus reserve increases with certain exceptions. Revenues in excess of the fiscal year spending limit must be refunded unless retention of such revenue has been approved by the voters.

TABOR requires local governments to establish emergency reserves. These reserves must be at least 3% of fiscal year spending (excluding bonded debt service). Local governments are not allowed to use the emergency reserves to compensate for economic conditions, revenue shortfalls or salary or benefit increases.

The Town believes it is in compliance with the provisions of TABOR. However, TABOR is complex and subject to interpretation. Many of the provisions, including the interpretation of how to calculate Fiscal Year Spending limits and qualification as an Enterprise will require judicial interpretation.

The Town passed a ballot question on November 5, 1996. The ballot question permitted the Town to collect, retain and expend, without imposing any new taxes or increases in its present mill levy on general property or its sales and use tax rates, the full revenues generated by the Town's sales and use tax, non-federal grants, its existing mill levy and any other excess revenues, commencing January 1, 1995, and each subsequent year, notwithstanding any state restrictions of Article X, Section 20, of the Colorado Constitution, and spend as a voter-approved change and exception to the limits which would otherwise apply for: (a) street construction, repair, and maintenance; (b) capital improvements; (c) parks and recreation; (d) police protection; (e) storm drainage; (f) snow removal; (g) street sweeping; and (h) other municipal services. In 2016, the Town received notification from the State of Colorado Department of Local Affairs that they have determined that the ballot question language is not sufficient to remove the Town from the statutory property revenue tax limitation of 5.5%.

# Note 14 Contingencies

Claims and Judgments – The Town participates in a number of federal, state, and county programs that are fully or partially funded by grants received from other governmental units. Expenditures financed by grants are subject to audit by the appropriate grantor government. If expenditures are disallowed due to noncompliance with grant program regulations, the Town may be required to reimburse the grantor government. As of December 31, 2018, grant expenditures had not been audited, but the Town believes that any future audits will not discover disallowed expenditures that would have a material effect on any of the individual governmental funds or the overall financial position of the Town.

# December 31, 2018

# Note 15 Net Position Restatement

For the year ended December 31, 2018, the Town adopted the provisions of GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions* (GASB No. 75), which is effective for financial statements beginning after June 15, 2017. GASB No. 75 revises and establishes new financial reporting requirements for most governments that provide postemployment benefits other than pensions (OPEB). GASB No. 75 requires cost-sharing employers participating in the Health Care Trust Fund (HCTF) administered by the Public Employees' Retirement Association of Colorado (PERA) to record their proportionate share, as defined in GASB No. 75, of the HCTF's net OPEB liability.

For the Town, the effect of implementing this standard was to change how it accounts and reports the net OPEB liability. Implementation of the standard resulted in a restatement of the prior period net position as shown below.

	Governmental Activities	Business-type Activities	Total
Net Position, December 31, 2017, as Previously Reported Cumulative Effect of Application of GASB No.	\$ 5,885,129	\$ 28,582,470	\$ 34,467,599
75, Net OPEB Liability	(24,910)	(55,834)	(80,744)
Net Position, December 31, 2017, as Restated	\$ 5,860,219	\$ 28,526,636	\$ 34,386,855

### Note 16 Subsequent Events

The Town has evaluated subsequent events through July 29, 2019 the date which the financial statements were available to be issued.
